

Using Java programming.

Open terminal to compile program.

Steps to Run

1. `javac -cp . project2/CoordinatorProcess.java`

2. `java project2.CoordinatorProcess`

User will be asked to input the number of additional processes

Waits for additional processes.

Open terminals based on the number of additional processes inputted one after the other

Compile the program in each terminal

➤ `javac -cp SlaveProcess.java`

Check the coordinator process terminal
